

MARBLE'S
OUTING
EQUIPMENT

After Thirty-Six Years

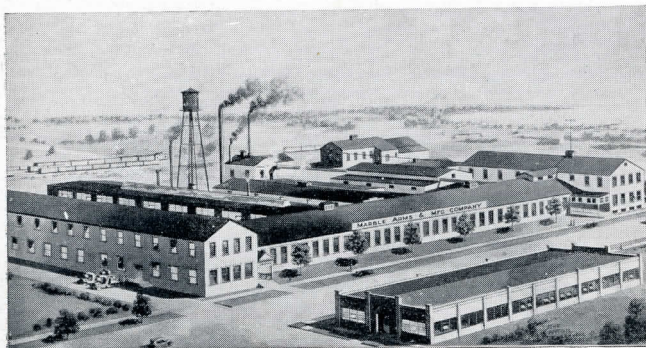

WEBSTER L. MARBLE
Founder
Marble Arms & Mfg. Co.

NINETEEN THIRTY-FOUR marks the thirty-sixth anniversary of the founding of Marble's, which, from the birth of an idea thirty-six years ago, has developed into an institution of enviable position. It was in May, 1898, that Webster L. Marble conceived the idea of a Safety Pocket Axe and made his first application for patent. In September, of that year, he finished his first axe. Today, Marble's Outing Equipment is known the world over and is recognized as the highest attainable standard in the field.

Good equipment is the pride of every sportsman. Things you use in the woods or on the water become dear to you through association. You prize them beyond their cost. Outdoor men have come to recognize the extraordinary dependability of Marble's Outing Equipment and the "Marble's" stamp on a piece of equipment is accepted with the same significance as "Sterling" on silver.

We can name noted outdoor men who have used Marble's axes, knives or other tools for from ten to twenty years—and they are still in use. Whatever you need, be it safety pocket and camp axes, hunting or fish knives, gun rods and cleaners, compasses, water-proof matchboxes, nitro-solvent oil, auxiliary cartridges, shell extractors or rifle sights, choose Marble's and you'll have the satisfaction of knowing you will never be disappointed.

Marble's Safety Pocket Axe

Every Sportsman, Tourist and Boy Scout knows the necessity and utility of a good axe. No other piece of equipment of so little weight proves so valuable on every occasion. For cutting your way through the underbrush, for chopping wood for camp, for pointing and driving tent stakes, and doing a hundred other jobs at home and away, you will want this famous razor-keen, finely-balanced Marble Axe. No other axe has the priceless safety feature. Carried in pocket or belt, a snap of the guard makes it ready for action.

"The Handiest Tool a Sportsman Ever Carried"

The nickel-plated spring-hinged guard is lined with lead and folds into the handle. The blade is made of tool steel, carefully tempered and sharpened. The nickel-plated metal handles are drop-forged and never break. The side plates are of hard rubber. Should be in the outfit of every hunter, trapper, fisherman, and in the automobile of every man who goes on a picnic or motor tour. A popular axe with Boy Scouts.

There are now nearly three hundred thousand Marble Axes in the hands of satisfied users.

Marble's Folding Claw Axes

No. 2½—Axe No. 2, with
claw\$3.50

This safety pocket axe with folding nail claw is strong enough to pull a ten-penny nail from a seasoned hemlock plank. One can get at and pull with axe blade and claw a nail that could not be removed with a hammer alone. Should be in the equipment of every trapper.

Folding Pick Axes

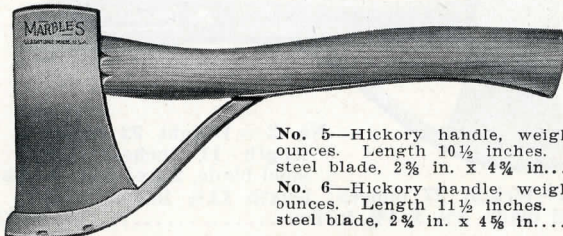

No. 2-P—Axe No. 2, with
Pick\$4.50

Geologist, mountaineer, miner and prospector find this tool indispensable to the success of an expedition. Ideal for trappers for pulling staples, breaking ice and ground.

The pick can be securely and instantly locked either up or down. It will stand unlimited service and will be found handy when climbing. When folded, axe-head can be safely used as a hammer.

Hickory Handle Axes

The wooden handles are of selected hickory and have nickel-plated steel guard and lining—for groove in handle.

No. 5—Hickory handle, weight 16 ounces. Length 10½ inches. Solid steel blade, 2¾ in. x 4¾ in...\$2.00

No. 6—Hickory handle, weight 22 ounces. Length 11½ inches. Solid steel blade, 2¾ in. x 4¾ in...\$2.25

Marble's Camp Axe

With Nail Puller

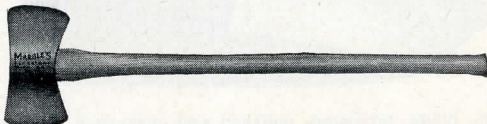

Accurately machined eye fits the handle perfectly. Is constructed to give the greatest bearing surface on the handle, so head cannot work loose. Tempered head, designed for driving stakes, spikes and so forth, will not become battered. Nail puller has tempered jaws. These are features exclusive in Marble's tool-steel axes.

- No. 10—Camp Axe. Average weight, 28 oz. Handles 16, 20 and 24 inches. Solid steel blade, $3\frac{1}{8}$ x $5\frac{1}{2}$ inches. \$2.50
 No. 30—Sheath, illustrated on page 4. .75
 Extra handles40

Marble's Double Bitted Axe

A delightful little axe for speedy work such as clearing a trail or cutting firewood. The double edge enables the user to always have one sharp edge for chopping and the other for general use.

- No. 15—Double-bitted Axe. Blade, $8\frac{1}{4}$ x $3\frac{3}{4}$ inches. Weight, $2\frac{1}{2}$ lbs. Handle, 28 inches. \$3.50
 No. 31—Sheath for No. 15 Axe. 1.25

Marble's Ideal Hunting Knife

Originated and developed by Mr. Webster L. Marble over thirty years ago to supply his own needs for dependable equipment.

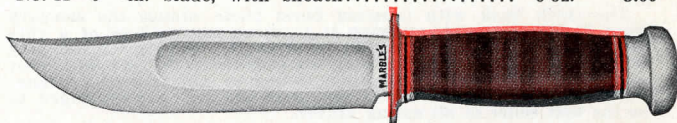

The thick strong blade is relieved by hollow grinding which provides proper balance for weight and size. Strength of back is necessary for splitting kindling or digging holes in hard ground or ice. The hollows aid quick sharpening and allow the original strength of back to remain. Blade is adapted to sticking and skinning. Back of point is beveled for breaking small bones. The *Ideal* is an every-purpose knife.

No. 41—Leather Handle. Furnished with Leather Sheath

Knives No. 41 and No. 45 have a heavy tang onto which are driven washers made of sole leather, red and black fibre and brass. Bolster is brass. Tip is aluminum. All parts held rigidly in place by a round brass nut sunk into tip, engaging the threaded tang. Blade is forged from high grade cutlery steel, polished and sharpened to a keen edge.

Marble's Woodcraft Knife

No. 49, Leather Handle

Handle, $3\frac{7}{8}$ inches, same construction as Ideal. Blade is $4\frac{1}{2}$ inches, forged from high grade cutlery steel, polished, and sharpened to a keen edge.

No. 50, Staghorn Handle

The thick back with tapering bevel blade carries the strength from handle to point, allowing it to serve the purpose of a thin blade, and yet it has a surplus of strength ordinarily found only in much heavier knives. It's an all-purpose knife that will meet every requirement of the hunting, fishing or canoeing trip. Thousands of Boy Scouts own and use these knives. Acknowledged to be the best seller of all outing knives.

No. 49—Leather handle—weight with leather sheath, 7 oz.....\$2.00
No. 50—Staghorn handle—weight with leather sheath, 7 oz.... 3.00

Marble's Expert Knife

Leather handle, aluminum tip, same construction as Ideal No. 41. Furnished with leather sheath.

These knives were particularly designed to meet the requirements of the professional hunter, trapper, and guide, who requires a thin, keen edge for dressing skins and furs. The back of the blade is designed for scraping skins, while on the forms. Popular with auto campers, as it has the strength of a heavy knife, but is thin enough for slicing, peeling, and general camp use. Blade is forged from high grade cutlery steel, polished and sharpened to a keen edge.

No. 545—Blade 5 in., handle $4\frac{1}{8}$ in., weight with sheath $6\frac{1}{2}$ oz. \$2.50

MARBLE'S Outing Equipment

FOR EVERY HOUR IN THE OPEN

Marble's Sport Knife

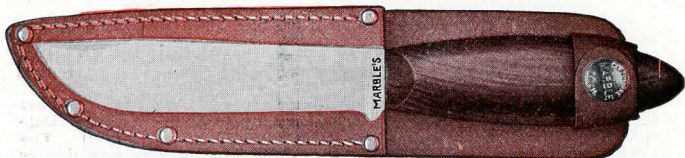

For outdoor or indoor use by the camper, canoeist, hiker, hunter, or fisherman. Has the features of all Marble Knives in compact form. Just the knife for those who have occasion to use a small one. Particularly adapted to the use of members of Boy and Girl Scout, Camp Fire Girl, and other similar organizations. A beautiful little knife to handle.

Leather handle, $3\frac{1}{2}$ inches, is of same construction as Marble's Ideal Knife. Blade forged from high grade cutlery steel, polished and sharpened to a keen edge.

No. 60—Leather handle, blade 4 in., wt. with sheath 4 oz.....\$2.00

Marble's Outdoor Knife

Blade is of high grade cutlery steel, properly tempered, polished and sharpened to a keen edge. Handle, 4 in., is walnut, shaped to fit the hand. An unusual value.

MARBLE'S Outing Equipment

FOR EVERY HOUR IN THE OPEN

Marble's Safety Hunting Knife

These knives will appeal especially to that class of woodsmen and sportsmen who object to a sheath knife, and yet want a knife that is heavy, strong and rigid. However, we furnish with each knife a sheath to fit it when folded, so that it can be carried at the belt when desired.

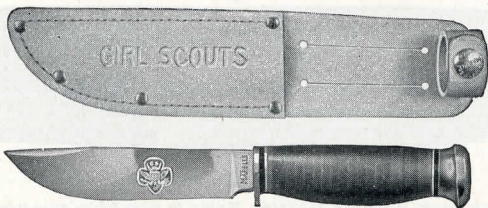

They have a long blade with a short handle—utilizing the extension guard as a safety lock when the knife is open. The blade is held in position by a spring, when either open or closed. The hilts—one on each side of the blade—and the bolsters and linings are of nickel-silver. Side plates are of real staghorn.

All parts are hand fitted with the utmost care, so that when knife is open it is as rigid as a one-piece knife.

No. 83—Blade $4\frac{1}{4}$ inches; wt. with leather sheath $5\frac{1}{2}$ ounces..\$3.50

No. 85—Blade 5 inches; wt. with leather sheath 8 ounces.. 4.00

Marble's Girl Scout Knife

Official knife of the Girl Scouts of America

Marble's Boy Scout Sheath Knife

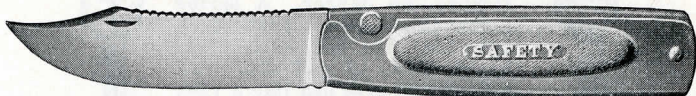

New Official Knife

Beautiful handle, made of washers of sole leather, colored fibre and brass, waterproofed and polished—aluminum tip. Blade and tang forged from one piece of high grade cutlery steel; carefully tempered, polished and sharpened to a keen edge.

No. 1560—Blade 4½ inches. With sheath.....\$1.75

Marble's Folding Fish Knife

The blade is made sharp at back of point for ripping and the back is an excellent fish scaler. It is a good knife for skinning game and for general camp use.

Fish Knife Folded

The blade, when folded, is entirely protected by the unique but simply constructed and operated nickel-silver handle. When open it is as safe and rigid as a one-piece knife.

No. 78—Blade 4 in. Weight 3½ ounces.....\$1.50

Marble's Trout Knife

Designed especially for dressing trout easily, neatly and rapidly, but is excellent for cleaning all fish. Forged from the finest cutlery steel, equal to that used in best surgical instruments; 5½ inches long, ½ inch thick. To use, hold with back down and insert little finger in ring. It fits the hand beautifully. It's sanitary—fishermen know how difficult it is to clean a pocket knife after dressing fish. May be easily carried in the pocket or fish basket.

No. 79—Blade 2 in. With metal bound leather sheath.....\$.75

MARBLE'S Outing Equipment

FOR EVERY HOUR IN THE OPEN

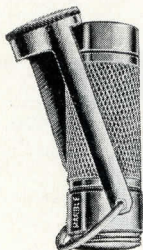

Marble's Waterproof Matchbox

It can be quickly opened and closed and is absolutely water and moisture proof.

A water-proof matchbox is cheap life insurance to the man who is caught out in wet and cold weather. It means warmth, dry clothes and something hot to eat and drink. They are always a comfort and sometimes they save lives.

Made of seamless drawn brass, heavily nick-eled. There is a rubber gasket in the cover. Inside diameter is a little larger than $\frac{3}{4}$ inch. Has hand ring for fastening to belt snap or chain.

No. 181—Price\$.60

Marble's Clincher Gaff

Controlled entirely by one hand—always ready. There's nothing to set—no steel trap feature—no danger. A spring holds jaws open. Just reach out—touch to fish—close your hand. Jaws of gaff shut with a flash and grip fish like a vise.

Will grip and hold any fish from $\frac{1}{2}$ to 20 pounds. Catch large slim fish by the tail; then they can't flop.

Gaff is 18 inches long, $7\frac{1}{2}$ inches between points; can be locked with points together. Made of polished steel, heavily nickeled.

No. 321\$1.25

Marble's Wrist Compass

Case is of polished brass, $1\frac{1}{8}$ inch in diameter. Unbreakable domed crystal. Agate bearing. Extremely accurate. High grade leather wrist strap. For the hunter, fisherman, camper, tourist, scout, and woodsman. Weight only 1 ounce.

Marble's Coat Compass

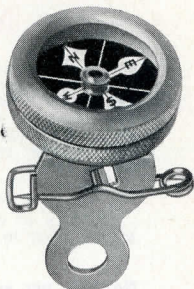

Made with water-proof screw case. Fastens to front of coat, or sleeve, or vest. It is in plain view at all times, and you can't lose it or leave it in camp. You don't have to fumble around in your pockets for your compass and then wait for it to settle, therefore, it is especially convenient in stormy weather. It balances so accurately that you can keep your direction while walking. It cannot become erratic through partial demagnetization.

In the darkness the luminous arrow on the revolving dial of the No. 082L and 186L compasses glows like a bar of light, and points the way nearly as plainly as in broad daylight.

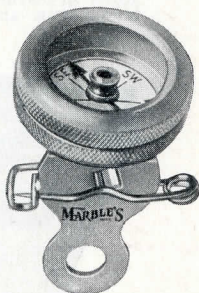

No sportsman should go into the woods without a compass—no woodsman would think of it.

Boxes are $1\frac{1}{8}$ in. in diameter. Bearings are agate.

Jointed Brass Rifle Rod

See That Steel Connection

Marble's Rod has several exclusive features, chief of which are the steel joint connection and the steel swivel.

The view of joint shows size of rod for .30 calibre and larger rifles. Note the size—which gives needed strength. There is a smaller size for .22 rifles.

Marble's Rod is dependable. It will not break off in your rifle. It is as rigid as a one-piece rod—and stays so.

Roller Bearing Swivel Shown Above

The end of rod is fitted with a steel, roller-bearing swivel, which will withstand hard thrusts and pulls and prevent unscrewing of joints.

The handle projects beyond ferrule and prevents marring of muzzle.

A Marble Rod costs only a little more than the ordinary brass rod, but it will last indefinitely.

Furnished with jagged and slotted tips and bag, and adaptors which make rod fit any make or size of cleaner.

No. 9622—.22 and .25 caliber, .204 in. diam. Length 26, 30, 36 in. \$1.25

Marble's Rifle Cleaner

Sections are made of eight brass gauze washers on a spirally bent spring-tempered steel wire, separated by smaller fibre washers. The brushes are a little smaller than bore of rifle or revolver. This allows the spiral spring to force but one side of each brush against the bore. Thus they follow the twist, reach into every angle of the entire rifling and rapidly remove all lead, copper, rust or powder residue. All calibers .22 to .45.

Rifle Cleaner—Mention caliber. Each.....\$.50

Marble's Field Cleaner

The cleaner is same as "Marble's Rifle Cleaner." The loop can be put over some projection, the weight dropped through gun and held in one hand, while with the other the gun is moved back and forth. This saves much time and labor in cleaning bad spots.

This Cleaner can be attached to any rifle rod.

Field Cleaner—Mention caliber. Each.....\$.75

Marble's Shotgun Cleaner

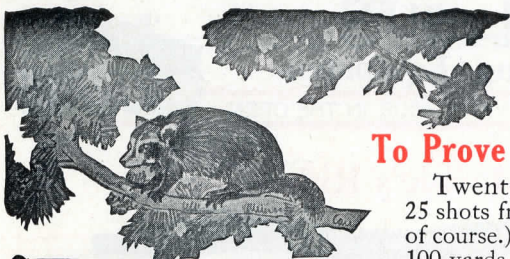

Made to Fit All Standard Rods
This Cleaner is Guaranteed Not to Injure the Bore

The brushes are composed of sixteen washers of softest brass gauze—smaller even than the choke—and are separated by wood fibre washers. The spring of the SPIRAL core forces one side of each brush against a different part of the circumference of the bore, with the result that the cleaner acts as would a single brush, except that equal pressure is exerted from chamber to muzzle, regardless of choke. When brushes become worn on one side they can be turned. The cleaner is exceedingly durable.

Shotgun Cleaner—Mention Gauge. Each.....\$.75

Shotgun Pull Through, same as shotgun cleaner with cords, weight and slotted tip. Mention gauge. Each.....\$1.00

Game Getter (at short range,
Killed at 50 to
have been
yards

Ammunition for Game Getter

Smokeless powder is used in the
Game Getter with perfect safety—
it gives a very slight recoil. The gun
can be held perfectly steady, as the grip is
very large and at right angles to shooter's arm.
Any standard make of .22 short, long or long rifle,
.410 or .44-40 shot or round ball ammunition can be
used in the Game Getter. A .44 ball penetrates 7 inches of pine
at 15 feet. The .44-40 cartridges giving best results are those
made especially for the Game Getter by leading manufacturers. Am-
munition so put up has "44 Game Getter" printed on the box. *We*
do not recommend the use of the regular .44-40 conical ball cartridge
on account of the heavy recoil—also bullets will key-hole at a very
short distance from the muzzle. Shot cartridges with wooden or
paper ends are especially adapted to rifled barrels. However, they
can be used in the Game Getter, but give uncertain results.

Who the Game Getter is for

The Game Getter Gun is made for every man who goes into the open. It is serviceable, it is
convenient. Once you have used it you will never start on a trip without it, for it weighs but a
pound and takes up so little room. Strap it over your shoulder, outside or under your coat, and
you are "ready for action" the instant any game appears.

TRADE MARK MARBLE'S GAME GETTER

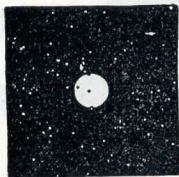

Two Guns in One— One Gun for All Game

The great need for an all purpose gun is filled by the Game Getter. You know, from actual experience, that the gun you *don't* take with you is the one you always want—carry a rifle and you'll have use for a shotgun; take the shotgun and you'll be sure to need a rifle. The Game Getter gives you *both*—upper barrel is .22 cal., rifled, for .22 short, long and long rifle cartridge. Lower barrel is smooth bore for .44 cal. and .410 gauge shot or round ball cartridge.

You Can Get Large Game —do wing shooting, practice at the target or bag small game without using expensive ammunition. The .44 ball is exceptionally accurate and powerful—with shot the Game Getter almost equals a 28 gauge shotgun. A more accurate .22 is not to be found. The average pattern of shot placed in a 12" square at fifty feet from a Game Getter Gun is as follows:

12 INCH GUN	
.410 2 in. shell loaded with No. 7½ shot.....	46
.410 2 in. shell loaded with No. 10 shot.....	98
.44-40 Game Get. car. loaded with No. 8 shot.....	63
.44-40 Game Get. car. loaded with No. 10 shot.....	130
15 INCH GUN	
.410 2 in. shell loaded with No. 7½ shot.....	57
.410 2 in. shell loaded with No. 10 shot.....	120
.44-40 Game Get. car. loaded with No. 8 shot.....	98
.44-40 Game Get. car. loaded with No. 10 shot.....	165
18 INCH GUN	
.410 2 in. shell loaded with No. 7½ shot.....	61
.410 2 in. shell loaded with No. 10 shot.....	136
.44-40 Game Get. car. loaded with No. 8 shot.....	88
.44-40 Game Get. car. loaded with No. 10 shot.....	140

These targets were made with one 12-inch barrel Game Getter at 50 feet without any change or adjustment of sights.

Showing 6-in. square taken from center of 12-in. target hit by 65 shot—100 in load.

Ten .22 bullets in 1-in. bull's eye off hand.

A .44 ball penetrates 7 inches of pine at 15 feet. The average pattern of shot is 70 No. 8 and 125 No. 10 in a 12-in. square.

Marble's Nitro-Solvent Oil

Is Your Gun Insurance

A Solvent is combined with a lubricant and other ingredients to make an oil that will dissolve and remove powder residue and leave the barrel and works lubricated.

It should be used alone—no other oil is necessary.

It stops corrosive action by neutralizing the acids of the residue before or after they have penetrated the steel.

Cleans and polishes varnished finishes.

Does not dry up quickly and will not gum. A perfect lubricant for reels, motors and light machines.

Marble's Anti-Rust Ropes

Gun Barrel Wicks—For Shotguns, Rifles, and Revolvers

When saturated with oil these "ropes" exclude all air and moisture and make it impossible for the barrels to rust or become pitted. They are

longer than the barrel and larger than the bore. This insures a constant pressure of oil against the entire circumference of the bore. One oiling will last a year.

Anti-Rust Ropes—For shotguns or rifles. (Mention gauge or caliber.) Each\$.60

For Revolvers. (Mention caliber.) Each..... .30

QUANTITIES OF OIL NEEDED TO SATURATE MARBLE'S ANTI-RUST ROPES

A 12-gauge rope needs $3\frac{1}{2}$ to 4 ounces. A 30-caliber rope needs two-thirds of an ounce.

To Saturate—Place rope in a receptacle and pour on oil until rope refuses to absorb any more, (a 12-gauge rope will hold 7 to 8 ounces) then wring out as dry as possible. As much oil will remain in the rope as stated.

From this information any one can figure out the quantity of oil to purchase to saturate any size rope.

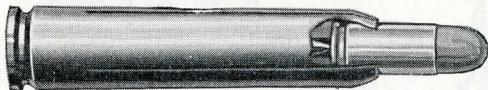

MARBLE'S

Outing Equipment

FOR EVERY HOUR IN THE OPEN

Marble's Auxiliary Cartridge

Places the pistol cartridges at the forward end of shell chamber for firing. Bullet takes rifling on being fired; does not strip and become deformed; does not lead the barrel. Gives thoroughly satisfactory results. It allows the use of very cheap ammunition for small game or target shooting in a large high-power rifle.

The implement is simple, strong and its use is perfectly harmless to any part of the rifle. Can be used through the magazine if desired.

When rifle firing pin hits auxiliary pin, neither is harmed, because the primer or rim is soft and takes up the impact.

Order by number in list below.....\$.75

9 Out Of 10 Improve Their Shots This Way

The secret of peep sight speed is this. Instead of trying to see three different objects at different ranges—the rear sight, the front sight and the target, you simply look **through** the peep to the bead and center it on the target. Regardless of your scoring ability, you will be surprised to see how this simplified sighting will improve your shots.

No matter how skillful you may be in handling a rifle, the chances are nine to one that you will improve your marksmanship with a combination of Marble's Sights.

Equip Your Gun With

MARBLE'S

Flexible Rear Sight and a
Marble's Bead Front Sight

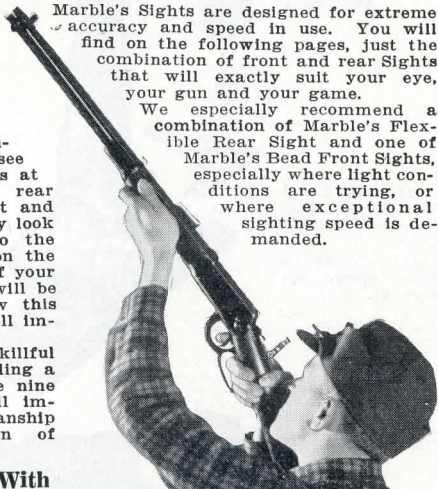

and you will find sighting easier, sure, and a "split-second" quicker.

MAKE THIS TEST

Which Circle Do You See First?

Cover the four circles above with your hand, or a piece of paper, then uncover them quickly—note which circle you see first. It will be the third from the left. Here's the reason: The eye automatically centers any object and involuntarily finds the center of a small circle. This demonstration explains the reason for quicker, surer aim with Marble's peep sight. You look through not at the rear sight. Your eye centers the bead of the front sight, and you swing it quickly on to the target. Greater accuracy is assured because the rear sight is nearer the eye and the distance between front and rear sights is greater. Much less of the target is concealed and there is no "blurring."

Marble's Flexible Rear Sight

No. S1
For 1899 Model Savage

No. R6
For Model 8 Remington
H. P. Auto Loader

IMPORTANT FEATURES

Automatic Joint. Whenever the sight is struck on front or back the coiled spring in the hinge brings it instantly into position for shooting. Can be locked down. This joint alone more than doubles the value of the sight.

If snow gets in peep hole it can be thrown out by pulling sight back and letting it fly forward.

Elevation Lock. The lower sleeve, when turned up against the elevating sleeve, prevents it from being turned and holds the disc stem true and rigid at any elevation.

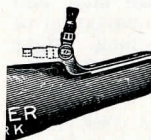

Interchangeable Discs. Discs having various sizes of outside diameter and different sizes of apertures can be used. See page 25.

Point Blank Adjustment. A screw in the bottom of disc permits a quick change of point blank range without tools.

This sight will fit all American rifles, except Remington Models 12, 14, 16, 24 and 25. (See page 24.) When ordering state whether or not the rifle has pistol-grip stock and be careful to give make, model and caliber. Furnished with discs, No. 1 and 2 having different apertures and proper screws for attaching sight to gun.

Flexible Rear Sight.....\$4.00

Flexible Sights for Bolt Action Rifles

To fit our Special Base Flexible Rear Sights to the Ross and Krag Bolt Action Rifles, it is usually necessary to cut back the combing from $\frac{1}{2}$ to $\frac{3}{4}$ inch so the upright of the sight will come back of the firing bolt when it is pulled back. Sights attach with screws to wood tang. Receiver sights for the Krag, Ross, Lee-Enfield and M-20 Savage Bolt Action Rifles described on page 24.

Marble's Simplex Rear Sight

A peep sight at a moderate price for .22 caliber rifles only

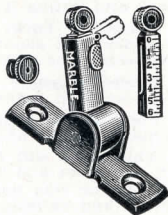

The stem can be set quickly in any position by raising the lock to a horizontal position and moving the stem up or down with the fingers.

The lock holds stem rigid at any elevation.

The sight is held quite firmly by an inside spring in the proper position for shooting, but can be easily folded down.

Furnished with discs, Nos. 1 and 2 having different apertures and proper screws for attaching sight to gun.

Simplex Rear Sight.....\$2.00

Marble's Receiver Sight

Adjustable for elevation and windage. Each quarter turn of elevation screw changes elevation .0125 of an inch, and each quarter turn of wind gauge screw gives a variation of .0104 of an inch. Aperture in disc is $\frac{3}{32}$ of an inch. Sight attaches to side of receiver, around ejector. Absolutely rigid. Furnished with drill, tap and screws.

Marble's Adjustable Leaf Sight

The leaf is firmly held in position by the spring of the long flat part when either up or down, and can be instantly put in either position. When folded down it permits a free use of peep and front sights.

The notch-piece is held at elevation desired by the screw at its side, and is also reversible. The "V" shaped notch is for use with Rocky Mountain Front Sight. The half round notch is for use with Bead Front Sights.

In addition to its utility as a middle sight it serves as a check to detect any deviation in the alignment of the other sights.

Marble's Sheard "Gold" Front Sights

This sight is guaranteed to show up well in the darkest timber, under any and all circumstances, and not to "blur." Will show the same color on different colored objects; will stand rough work and improve the shooting greatly. Gold bead is welded to the steel.

Made to fit nearly all sporting and military rifles, carbines, target revolvers and pistols, Luger and Mauser automatic pistols.

When ordering Sheard Front Sights for Mauser and Mannlicher Rifles, send front sight now in use on rifle as sample to make sure that correct sight is sent.

No. 6

No. 11

Nos. 36 and 37

No. 40

Give make, model and caliber of rifle.

Sheard Sight—With medium bead, each.....\$1.50

Marble's V- M Front Sight

As the eye quickly and surely finds the center of the peep sight, so it finds the center of this front sight. The object aimed at is not covered up by the front sight. The shooter aims directly at the point of impact instead of lower, as is necessary with bead sights. The act of aiming is without effort and always accurate.

Face and lining of aperture are made from our lustrous Pope's Island gold, visible in the dimmest light. The aperture is 5/32-inch diameter, 1/4-inch outside diameter, 1/8-inch deep.

Marble's Vickers-Maxim Sights can be supplied in heights of 1/8, 3/8 and 1/2 inches to fit all rifles with standard front sight slot. Also for rifles and carbines listed under Nos. 894, 895, 11, 16 and .44 for Ross .280 only, on pages 29 and 30.

Give make, model and caliber of rifle.

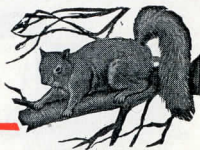

V-M Front Sight—Each.....\$1.50

MARBLE'S

Outing Equipment

FOR EVERY HOUR IN THE OPEN

Marble's Standard Sight

Ivory or Gold Bead

Handsome and well made. The ivory beads are from whitest elephant tusks and are convex. The lustrous Pope's Island Gold Beads are convex and are visible in dim light. For all American made rifles in 1/16, 3/32 and 1/8 inch beads.

Standard Sight—Give make, model and caliber of rifle. Each..\$1.00

Marble's Improved Sight

Ivory or Gold Bead

We may justly describe this sight as a "long look ahead." It enables one to make accurate shots at any range without stopping to adjust the rear sight.

On a range somewhat longer than the gun is sighted for one can see the object aimed at under the center of the bead as well as over.

It is an exceptionally valuable sight for running shots and is used for shooting at objects in the air by the most famous professional riflemen.

Improved front sights in heights of $\frac{1}{16}$ and $\frac{11}{32}$ inches are made in $\frac{1}{16}$ and $\frac{3}{32}$ inch beads only. Heights of $\frac{3}{8}$ and $\frac{7}{16}$ inches are made in $\frac{1}{16}$, $\frac{3}{32}$ and $\frac{1}{8}$ inch beads.

Improved Sight—Give make, model and caliber of rifle. Each..\$1.00

Marble's Reversible Sight

Ivory and Gold Beads

Both beads are the same size and are furnished in $\frac{1}{16}$ or $\frac{3}{32}$ inch sizes for the 5/16 and 11/32 inch heights, 1/16, 3/32 and 1/8 inch for the 3/8 and 7/16 inch heights.

This combination can be relied upon to meet every possible condition of light, background, etc.

This sight can be instantly reversed. Simply pull up the bead carrier against the pressure of the spring until it clears the groove—then turn it around.

A dowel near each end of groove engages with holes in the bottom of bead carrier. These would take up the shock of a blow on either end.

Reversible Sight—Give make, model and caliber of rifle. Each \$1.50

Marble's Shot Gun Sights

Size $\frac{5}{32}$ in.

Bi-Color Front

Ivory Rear

Rear Sight Reamer

Front Sight Reamer

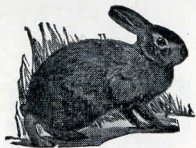

Ivory body with gold cap and steel base. Construction eliminates danger of breakage. Can be seen in any light. Easily attached by use of reamer.

Ivory Rear

This sight should be placed at about the center of the barrels, or from 12 to 16 inches from the muzzle sight, according to length of gun and shooter's eyesight—never more than 18 inches.

For Double Barrel Guns Only

No. 220—Both sights and reamers\$1.20
No. 221—Bi-Color Front Sight, $\frac{5}{32}$ in. dia..... .60

Marble's Shot Gun Sights Ivory Front for Double Guns

Actual size
11/64 in. (.172")

Reamer for Front Sight

Its whiteness and large size make it more easily seen than the ordinary metal front sights. Greatly increases accuracy in shooting. Easily attached by use of reamer.

For Double Barrel Guns

No. 219—Bi-Color Front Sight, 5-32 in. Tap and Wrench.....	1.00

Marble's Semi-Rib

The optical effect in using this device is the same as when using a gun with rib the full length of barrel. It does not make gun muzzle heavy, yet gives all the advantages of a full-length rib with but nominal cost. If a person under-shoots (a common fault) the rib can be shimmed up with paper. The ribs prevent sighting over side of frame and assist in quick, accurate firing.

No. 227—For Model '97 and M-12 Win. Repeater, 12-gauge only \$1.00

Rifle Sighting Department

We are equipped to attach and align our sights to rifles, and target them on our fifty yard range. Guns sent us for this purpose should be sent prepaid (see shipping instructions below). Our usual charge for this work is \$2.25 in addition to list price of the sights. This includes the necessary ammunition. If special work is required in the fitting of the sights or if receiver sights are to be fitted, there will be an additional charge to cover the extra labor involved.

Terms of Sale

The Consumer Should Buy from a Dealer When Possible

The List Price is the Net Price to the consumer. We prepay transportation to the consumer, except on guns, ammunition and Nitro-Solvent Oil.

All orders from persons not dealers must be accompanied by cash.

Discount to dealers in sporting goods and kindred lines. Ask for Special Trade Catalog, and give name of your jobber.

Customers outside the United States should remit by postal money order or New York or Chicago draft. If personal check is sent, sufficient amount should be added to cover exchange.

Claims for errors must be made immediately upon receipt of goods.

Shipping Instructions

All goods not exceeding seventy pounds in weight, nor making a package having a combined length and girth of over 84 inches may be sent by mail to all parts of the United States at the rates and according to the regulations of the United States Parcel Post Law.

We are not responsible for goods lost in the mails.

We will insure goods ordered sent by mail or parcel post for the following amounts; 5c for orders not exceeding \$5.00; 5c for orders not exceeding \$25.00; 10c for orders not exceeding \$50.00; 25c for orders not exceeding \$100.00.

Explosives cannot be mailed.

Write your name and address plainly.

Give post office address, with name of state and county.

All packages sent us should be plainly marked with name and address of shipper, and all express charges should be prepaid.

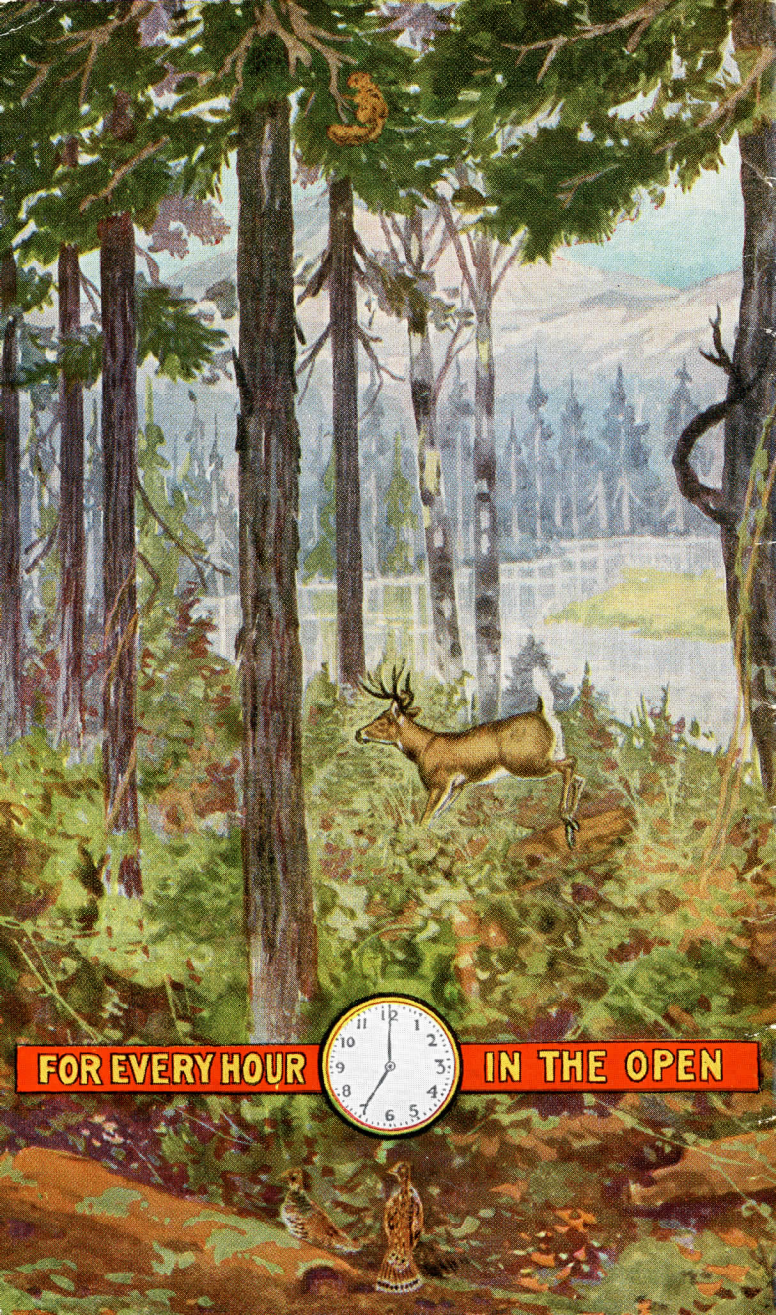

Firearms sent by express or parcel post should be boxed, or well wrapped, and tied to a board. If merely wrapped in paper or cloth, double rates are charged by express companies.

Firearms sent to us will be returned in the same box as received. If we furnish a box 75c additional will be charged.
